ANALYSTS

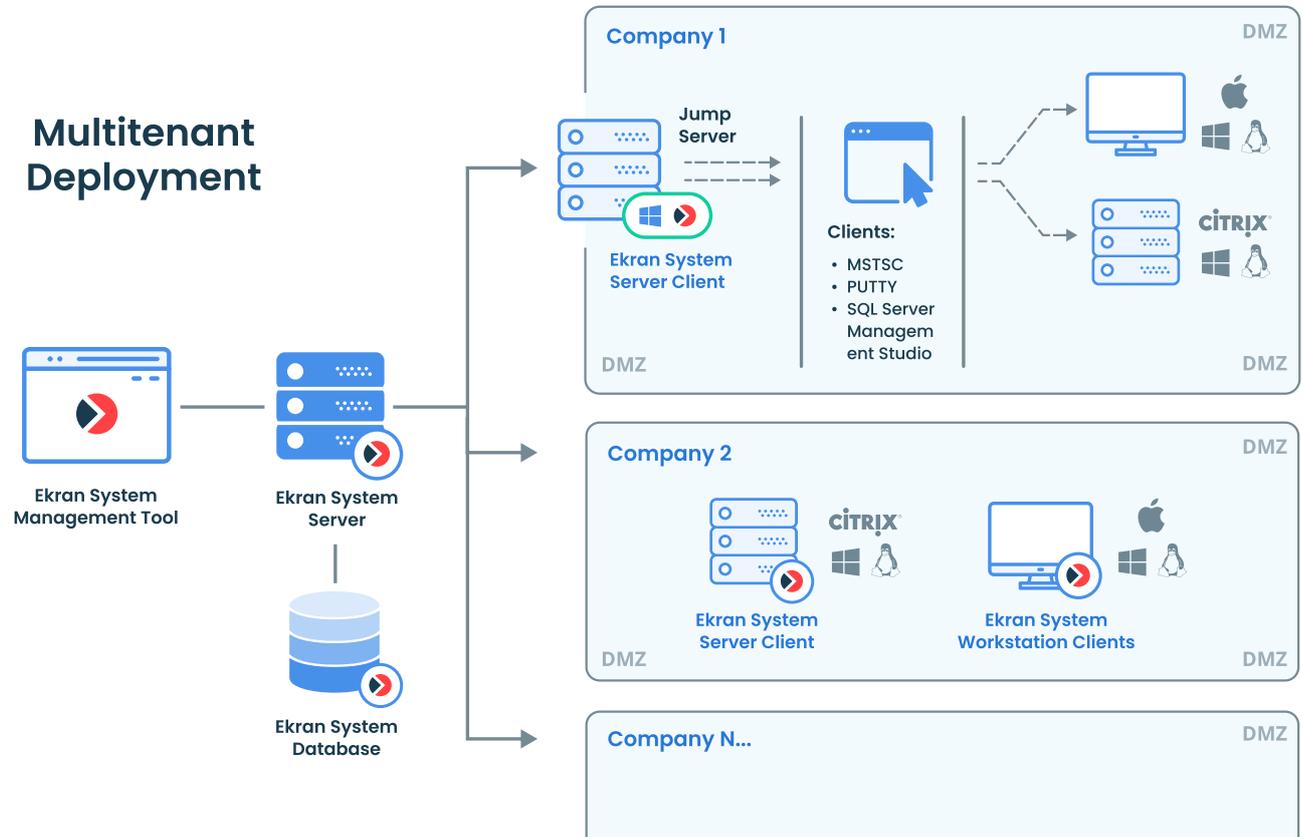

“As a Managed Service Provider we are responsible for our customers' servers but aren't the only ones with access and often well-intentioned 3rd parties cause disruption with unauthorised changes. Ekran gives us peace of mind that all actions carried out on the server are recorded and we can quickly identify & rectify issues. It's like having CCTV for your server and in these times of a need for heightened security and auditing this is perfect for the job.

Adrian Cragg,
CTO of CNC Ltd

► Multi-tenant deployment architecture

The multi-tenant mode was developed to allow professional service companies to fully manage the security of their customers from a single location.

This deployment mode allows multiple independent tenants to operate in the Ekran System environment. Data of each tenant including monitoring data, user credentials, Client names, system configuration, etc. is completely independent and is not accessible by other tenants.

► Why partner with us?

We address the problem of insider threats — the main cause of 30% of data breaches in 2020.

We're recognized in the industry by global giants such as Microsoft and NIST.

We're constantly expanding with more than 90% year-over-year growth in the last four years.

You'll have no competitors to worry about thanks to our fully transparent partnership program.

You'll be able to answer your customers' toughest demands with a full cycle insider threat management platform.

You'll get full support with free training and personalized technical pre-sales, post-sales, and marketing assistance.

► Licensing

Ekran System® is licensed based on the number of endpoints and is offered in Standard and Enterprise Editions. The Enterprise Edition includes several enterprise-grade maintenance and integration features.
